

The Courier Search API allows users to retrieve parcel delivery summaries and total parcel reports from various courier services (e.g., Steadfast, RedX, Pathao, Paperfly) based on a phone number. Users must provide a valid API key and a phone number to get the reports.

Base URL

<https://dash.hoorin.com/api/courier/api> (for individual courier summaries)

<https://dash.hoorin.com/api/courier/sheet> (for total parcel summary)

Endpoints

GET [/api/courier/api](https://dash.hoorin.com/api/courier/api) – Retrieve parcel summaries from individual couriers.

GET [/api/courier/sheet](https://dash.hoorin.com/api/courier/sheet) – Retrieve total summary of parcels.

Query Parameters

Parameter	Type	Description
apiKey	string	The API key assigned to the user. Replace <code>example_api_key</code> with your key.
searchTerm	string	The phone number to search for parcel delivery reports.

Example Request

For individual courier summaries:

https://dash.hoorin.com/api/courier/api?apiKey=your_api_key&searchTerm=01642444088

For total parcel summary:

https://dash.hoorin.com/api/courier/sheet?apiKey=your_api_key&searchTerm=01642444088

Response (Courier Summaries)

The API returns a JSON object containing summaries of parcel deliveries and cancellations from various courier services.

Example Response:

```
{  
  "  
    "Summaries": {  
      "Steadfast": {  
        "Total Parcels": 12,  
        "Delivered Parcels": 12,  
        "Canceled Parcels": 0,  
      }  
    }  
}
```

```
        "Details": [],
    },
    "RedX": {
        "Total Parcels": 10,
        "Delivered Parcels": 8,
        "Canceled Parcels": 2
    },
    "Pathao": {
        "Total Delivery": 22,
        "Successful Delivery": 22,
        "Canceled Delivery": 0
    }
}
}
```

Response (Total Parcel Summary)

The API returns a JSON object with total parcel data from all courier services.

Example Response:

```
{  
  "totalSummary": {  
    "Total Parcels": 46,  
    "Delivered Parcels": 44,  
    "Canceled Parcels": 2  
  }  
}
```

Usage Policy and API Key Security

Your **API Key** is intended for your exclusive use with a single domain or application.

Good news! We do **not** enforce a strict rate limit for clean usage. If your system is running cleanly and not being misused, you don't need to worry .

However, our system strictly monitors for misuse:

Using the same API key across **multiple distinct domains** or applications.

Systematic misuse, including attempts to overload the service, and other malicious activities.

⚠️ Immediate Ban and No Refund Policy: If the system detects any of the above-mentioned **misuse or violations**, the associated API key will be **immediately and permanently banned**. In all cases of API key ban due to misuse, **no refunds** will be issued for any remaining subscription or credits.
